PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building production-grade web applications using Next.js, React, Node.js, and PostgreSQL. Currently working at Bizotic Supervision Pvt Ltd, where I have designed and deployed a complete enterprise SaaS platform single-handedly — spanning 99 pages, 92 REST APIs, and 31 database models — equivalent to a multi-developer team project. Strong expertise in scalable architecture, database design, cloud integration (AWS), and building domain-specific solutions including CRM, Billing, and GST compliance systems for the Indian market. IT Postgraduate with a proven track record of delivering end-to-end products from concept to deployment.

TECHNICAL SKILLS

Frontend: Next.js 16, React 19, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS 4, Bootstrap, Recharts, Responsive Design

Backend: Node.js, Next.js API Routes, Django, REST APIs, JWT Authentication, Middleware, Cron Jobs

Database: PostgreSQL, Prisma ORM, Neon Serverless, MySQL, Database Schema Design, Query Optimization

Cloud & DevOps: AWS S3, AWS SES, AWS CloudFront, Vercel, Git, GitHub, Signed URLs

Tools & Others: jsPDF, xlsx, Sharp, bcrypt, jose (JWT), Figma, Chrome DevTools, Postman, ESLint, Adobe Photoshop, VS Code

Programming: JavaScript, Python, C, C++

Domain Expertise: SaaS Development, CRM Systems, Billing & Invoicing, Indian GST Compliance, Role-Based Access Control, Multi-Tenant Architecture

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER | Bizotic Supervision Pvt Ltd | 2026 – Present

Flagship Project — Bizotic WebApp (Enterprise SaaS Platform)

- Single-handedly designed, developed, and deployed a production-grade multi-role business management SaaS platform combining CRM, Billing, GST Compliance, HR, and Analytics — comparable in scope to Zoho Books and Vyapar.
- Built 99 responsive page screens across 4 distinct user roles (Admin, BDM, Team Leader, Team Member) with role-based access control and JWT authentication.
- Developed 92 REST API endpoints using Next.js App Router and Prisma ORM with full CRUD operations, business logic, and validation.
- Designed and implemented a 31-table PostgreSQL schema with complex relational mappings for Users, Teams, Clients, Invoices, Deals, Leads, GST Filings, Attendance, Tasks, and Payments.
- Built a complete Billing & Invoicing suite supporting 6 document types (Invoice, Estimate, Proforma, Sale Order, Delivery Challan, Credit Note) with multi-state Indian GST calculation (CGST/SGST/IGST), HSN codes, and PDF generation.
- Implemented GST Compliance module tracking GSTR1, GSTR3B, GSTR9, and QRMP filings with bulk Excel import and status tracking.
- Developed CRM module with Deals pipeline (6 stages × 5 pipelines), Leads management, and lead-to-client conversion workflow.
- Built 8 analytics dashboards with Recharts including revenue trends, pipeline visualization, executive KPIs, and team performance metrics.
- Integrated AWS S3 and CloudFront CDN for secure file management with presigned URLs, and AWS SES for transactional email delivery.
- Implemented recurring invoice generation using cron jobs and automated deadline reminder notifications.

- Developed real-time team chat with file attachments, read receipts, and online status tracking.
- Created 57 reusable React components with a consistent design system using Tailwind CSS 4 and Lucide icons.

Tech Stack: *Next.js 16, React 19, Prisma 7, PostgreSQL (Neon), Tailwind CSS 4, AWS (S3/SES/CloudFront), jsPDF, xlsx, Recharts, JWT (jose).*

Key Contributions

- Took complete ownership of the product lifecycle — requirement analysis, architecture design, development, testing, deployment, and ongoing maintenance.
- Managed database schema evolution and migrations across multiple release cycles without data loss.
- Collaborated directly with business stakeholders to translate requirements into technical specifications.
- Set up CI/CD pipelines and production deployment workflows on cloud infrastructure.

ACADEMIC PROJECTS

Opportunistic Routing Protocols | *MTech Thesis* | [GitHub](#)

- Analyzed performance of opportunistic routing protocols under varying message sizes and mobility patterns.
- Evaluated how larger messages decrease delivery ratio and increase delay across different mobility models.
- Published findings on protocol selection criteria for optimizing network performance under specific conditions.

Underwater Image Enhancement | *BTech Project* | [GitHub](#)

- Developed Python-based image enhancement system addressing colour distortion, low contrast, and haze in underwater imagery.
- Implemented colour correction, contrast adjustment, and dehazing algorithms to improve image quality.
- Enabled better analysis and visual understanding of underwater environments for research applications.

EDUCATION

M.Tech in Information Technology | DGPA: 8.73 | 2021 – 2023

Government College of Engineering and Ceramic Technology

- Bronze Medal — Ranked 3rd in M.Tech batch.

B.Tech in Information Technology | DGPA: 8.11 | 2017 – 2021

Government College of Engineering and Leather Technology

ACHIEVEMENTS

- Bronze Medal — M.Tech (3rd Rank in batch).
- Shipped a production enterprise SaaS platform as solo developer (99 pages, 92 APIs, 31 DB models) — market equivalent ₹12–18 lakhs.
- WBUT PGET 2021 — Rank 187.
- WBJEE 2017 — Rank 3634.

LEADERSHIP & ACTIVITIES

- Class Representative (CR) — IT Department.
- Organizing Committee Member — Annual Cultural Feast.
- Active Member — Rotaract Club, GCELT.
- Organized Blood Donation Camp.
